TECHNICAL PROJECTS

Vinylfy - Github | Demo
Vinylfy connects users/sellers to the niche market of buying/selling vinyl records in a fun and easy-to-use manner.
- Full Stack Project, frontend, and backend in Ruby on Rails
- Worked and communicated with a team of 2 developers.
- Utilized session storage to create and persist user data.
- Implemented Auth for all new user information.
- Constructed analytical functions from the backend.

Quote-Taker - Github | Demo
A simple and fun application where users can keep track of their favorite quotes.
- Full Stack Project frontend created using Javascript and React.
- Communicated with 3 other developers for insights on the project.
- Designed and implemented backend using Ruby on Rails.

AirDok - Github(Frontend)| Github(Backend) | Demo
A complex and functional application that connects users to private airplane hangar owners to rent/reserve their services.
- Full Stack Project, using Javascript and React to create frontend.
- Introduced Redux for state management.
- Created backend using Ruby on Rails.
- Used serializers to allow ease of use for complex relationships.
- Developed JWT on the backend.
- Implemented token storage.
